

# Actifio CDS and Sky Tech Brief

# Updating an Actifio Appliance from the Actifio Desktop

To update the software on your Actifio appliance:

1. Obtain a patch .gpg file from your Actifio Representative and save it in a location accessible by the appliance.

**Note:** Do not use Safari to download Actifio scripts for installation, updates, or patching. Safari automatically saves some files in formats that are different than those the update and installation scripts call for. Use another browser.

- 2. From the Actifio Desktop, open the **Domain Manager**.
- 3. Select Software Upgrade > Upload & Install.

Omain Manager			_			<b>≡</b> ×

SOFTWARE UPGRADE     Upload & Install	D					

#### The Software Upgrade Feature of the Domain Manager

4. On the Upload & Install page, click **Upload**. A file selection box is displayed. Select the .gpg update file.

#### **Upload in Progress**

5. The upload can take a long time. When you see **Update uploaded successfully**, click **OK**. The Upload & Install page shows the newly uploaded file in the Available Upgrades section. It will immediately run a preflight check and then wait until you are ready.
